

Are You Suffering From

Persistent sore throat

Fatigue or weakness

Joint pain or swelling

Shortness of breath & fever

Watch Out, It Can Be A Streptococcal Infection!

Significance

The Anti Streptolysin-O (ASO) test measures the presence of antibodies against streptolysin O, a toxin produced by group A Streptococcus bacteria. Elevated levels of ASO can indicate a recent streptococcal infection and are commonly used to help diagnose conditions, such as strep throat or skin infection, rheumatic fever, scarlet fever, or glomerulonephritis—a type of kidney inflammation.

Anti Streptolysin - O (ASO)
