

Prevent Inherited Blood Disorders with Smart Screening

Significance

The Beta-Thalassemia Screening test checks for genetic changes that cause beta-thalassemia, an inherited blood disorder that affects hemoglobin production. This test helps identify if a person is a carrier or has the condition, which can lead to anemia and other complications.

Beta-Thalassemia Screening (5 Parameters)

@ ₹ 572/-

- Hemoglobin A2
- Hemoglobin C
- Hemoglobin D
- Hemoglobin F
- Hemoglobin S

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**
