

Struggling With Hair Loss or Acne?

It Can Be Due To Hormonal Imbalance

Significance

The Dihydrotestosterone (DHT) test measures the level of DHT, a powerful male hormone derived from testosterone. It helps assess hormone-related conditions such as hair loss, prostate issues, or signs of hormonal imbalance in both men and women. This test is useful when investigating symptoms like hair thinning, acne, infertility, or abnormal sexual development.

Dihydrotestosterone (DHT)
