

HbA1c with Graph

Track Your Sugar Status Regularly With
Accurate & Reliable Reports

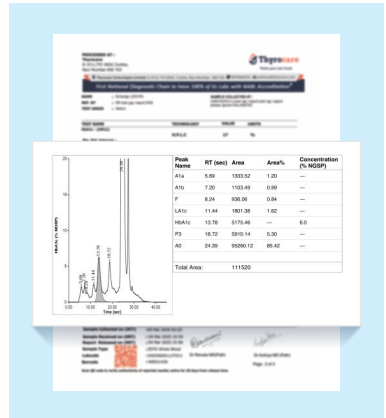

HbA1c with Graph (HBA1CWG)

@ ₹499/-

Introducing HbA1c with Graph Report using D-100 technology, For the First Time!

- Includes detailed insights: Hemoglobin variants, values, peaks & technical windows for improved clinical decisions
- More accurate than Turbo – fewer rejections with precise variant values (not estimates)
- Faster processing with better TAT
- High precision, reliability & accuracy

Significance

We are enhancing the HbA1c test with a graph report, allowing you to visually track your diabetes status over time. This test measures average blood sugar levels over the past 2–3 months. It accurately diagnoses and monitors diabetes. Unlike daily glucose checks, which can vary due to meals or stress, HbA1c provides a long-term snapshot of blood sugar control. The new graphical representation helps physicians better understand trends and make informed decisions about diabetes management plans with greater clarity.

First National Diagnostic Chain to have **100%** of its
Labs with **NABL Accreditation***

**As on 5th December 2024*

CAP
From 2007

**As per a survey on doctors' perception of laboratory diagnostics (IJARIIT, 2023)*

Trust that Thyrocare
reports are **Accurate & Reliable***

98% Reports released **Within 06 hours**
after samples reach the lab
