

# Take a Wise Decision for Maternal Health

**Rubella - IgM**

**@ ₹ 334/-**

## Significance

The test detects the presence of immunoglobulin M (IgM) antibodies in the blood, confirming a recent infection with the rubella virus. This test is particularly important for pregnant women or those with symptoms such as fever, a red blotchy rash starting on the face and spreading to the body or joint pain. Rubella infection during pregnancy can lead to serious congenital defects.
