

Strengthen your Immunity to Protect Yourself and Your Baby

Toxo Gondii - IgM

@ ₹ 429/-

Significance

The test detects IgM antibodies against *Toxoplasma gondii*, the parasite responsible for toxoplasmosis. Unlike the IgG test, which indicates past exposure, the presence of IgM antibodies suggests a recent or active infection. This test is recommended to pregnant women and immunocompromised individuals, as an active toxoplasmosis infection during pregnancy or with a weakened immune system can lead to serious complications.
