TSH - Ultrasensitive

@ ₹ 250/-

Significance

The TSH - Ultrasensitive test is used to assess the functioning of the thyroid gland. It measures the level of Thyroid Stimulating Hormone (TSH) in the bloodstream and is especially useful for detecting early-stage thyroid dysfunctions such as hypothyroidism (underactive thyroid) & hyperthyroidism (overactive thyroid). This test is often recommended for routine thyroid screening, monitoring thyroid treatment, or investigating symptoms like fatigue, weight changes, or menstrual irregularities.
