

Detect the Cause Behind Urinary Tract Infection

Significance

Urine, Culture and Susceptibility - (Outlab) test detects the presence of bacteria or yeast causing urinary tract infections (UTIs) by analyzing the appearance, concentration and content of urine to spot potential health issues. This test is recommended to the individuals experiencing symptoms of UTIs, such as pelvic, lower abdominal or back pain, burning sensation while urinating & frequent urge to urinate.

Urine, Culture And Susceptibility - (Outlab)
