First National Diagnostic Chain to have 100% of its Labs with NABL Accreditation#

Patient Name	: XXXXXXXXXXXX	Sample Collected on (SCT)	: XXXXXXXXXXXX
Referred By	: XXXXXXXXXXXX	Sample Received on (SRT)	: XXXXXXXXXXXX
Sample Collected At	: XXXXXXXXXXXX	Report Released on (RRT)	: XXXXXXXXXXXX
		Sample Type | Barcode	: XXXXXXXXXXXX

TEST NAME	TECHNOLOGY	VALUE	UNITS
SM (SMITH) ANTIBODY, IGG	ELISA	0.67	Ab Index

Bio. Ref. Interval. :-

Normal range: < 0.9

Interpretation:

Antibody Index Range || Interpretation
< 0.9 || No detectable Sm antibodies
0.9 – 1.1 || Borderline - follow up testing recommended if clinically indicated
> 1.1 || Presence of Sm antibodies, suggestive of autoimmune activity (e.g., SLE or other MTDs, mixed connective tissue disorders)

Clinical Significance:
1.The presence of Sm antibodies is a highly specific marker for Systemic Lupus Erythematosus (SLE).
2.These antibodies are rarely detected in other autoimmune diseases or in healthy individuals.
3.Therefore, this test is valuable for the diagnosis and prognosis of autoimmune conditions such as SLE, mixed connective tissue disease, Sjogren syndrome, scleroderma, and polymyositis/dermatomyositis.
4.SLE patients with presence of Anti Sm antibodies usually have associated renal disease and / or disorders of central nervous system.

Limitations:
1.The test results obtained serve only as an aid to diagnosis and should be interpreted in relation to the patient's history, physical findings and other diagnostic procedures. Lipemic or hemolyzed samples may cause erroneous results.
2.Rarely, some sample specific factors and cross reactivity may interfere with the results
3.This is a screening test, to be confirmed by a confirmatory test if clinically indicated.

Please correlate with clinical conditions.

Method:- ENZYME-LINKED IMMUNOSORBENT ASSAY (ELISA)

Dummy Report

CONDITIONS OF REPORTING

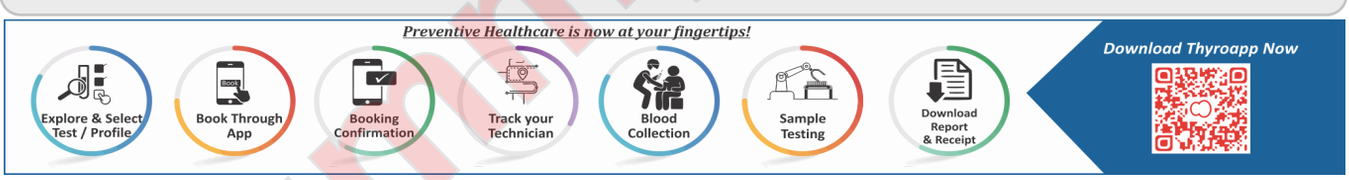

- The reported results are for information and interpretation of the referring doctor only.
- It is presumed that the tests performed on the specimen belong to the patient; named or identified.
- Results of tests may vary from laboratory to laboratory and also in some parameters from time to time for the same patient.
- Should the results indicate an unexpected abnormality, the same should be reconfirmed.
- Only such medical professionals who understand reporting units, reference ranges and limitations of technologies should interpret results.
- This report is not valid for medico-legal purpose.
- Neither Thyrocare, nor its employees/representatives assume: (a) any liability, responsibility for any loss or damage that may be incurred by any person as a result of presuming the meaning or contents of the report, (b) any claims of any nature whatsoever arising from or relating to the performance of the requested tests as well as any claim for indirect, incidental or consequential damages. The total liability, in any case, of Thyrocare shall not exceed the total amount of invoice for the services provided and paid for.

EXPLANATIONS

- Majority of the specimen processed in the laboratory are collected by Pathologists and Hospitals we call them as "Clients".
- **Name** - The name is as declared by the client and recored by the personnel who collected the specimen.
- **Ref.Dr** - The name of the doctor who has recommended testing as declared by the client.
- **Labcode** - This is the accession number in our laboratory and it helps us in archiving and retrieving the data.
- **Barcode** - This is the specimen identity number and it states that the results are for the specimen bearing the barcode (irrespective of the name).
- **SCP** - Specimen Collection Point - This is the location where the blood or specimen was collected as declared by the client.
- **SCT** - Specimen Collection Time - The time when specimen was collected as declared by the client.
- **SRT** - Specimen Receiving Time - This time when the specimen reached our laboratory.
- **RRT** - Report Releasing Time - The time when our pathologist has released the values for Reporting.
- **Reference Range** - Means the range of values in which 95% of the normal population would fall.

SUGGESTIONS

- Values out of reference range requires reconfirmation before starting any medical treatment.
- Retesting is needed if you suspect any quality shortcomings.
- Testing or retesting should be done in accredited laboratories.
- For suggestions, complaints, clinical support or feedback, write to us at **customersupport@thyrocare.com** or call us on **022-3090 0000**
