Thyrocare Technologies Limited, D-37/3, TTC MIDC, Turbhe, Navi Mumbai - 400 703. 9870666333 wellness@thyrocare.com

First National Diagnostic Chain to have 100% of its Labs with NABL Accreditation#

Patient Name	: XXXXXXXXXXXXXXXXX	Sample Collected on (SCT)	: XXXXXXXXXXXXXXXXX
Referred By	: XXXXXXXXXXXXXXXXX	Sample Received on (SRT)	: XXXXXXXXXXXXXXXXX
Sample Collected At	: XXXXXXXXXXXXXXXXX	Report Released on (RRT)	: XXXXXXXXXXXXXXXXX
		Sample Type | Barcode	: XXXXXXXXXXXXXXXXX

TEST NAME	TECHNOLOGY	VALUE	UNITS
FECAL CALPROTECTIN (CLIA)	CLIA	100	µg/g

Bio. Ref. Interval. :-

Interpretation :
Normal: <50 µg/g
Borderline: 51-150 µg/g
Low positive: 151-250 µg/g
High positive: >250 µg/g
NOTE - Values above 150 µg/g are strongly indicative of endoscopically and/or histologically evident disease activity in a known case of IBD (Inflammatory Bowel Disease)

Clinical significance:
1.Calprotectin is a neutrophilic cytosolic protein ,the concentration of which in stool reflects the number of neutrophilic migration to the intestinal mucosa.
2. Calprotectin Assay can be used as an aid in the diagnosis of inflammatory bowel diseases (IBD), specifically Crohn's disease and ulcerative colitis, and as an aid in differentiation of IBD from irritable bowel syndrome (IBS).
3. It is used in monitoring treatment response, prognosis and relapse in cases of IBD.
4. It is recommended to re-evaluate borderline fecal calprotectin levels after 4-6 weeks to determine the inflammatory status.
5. Test results are to be used in conjunction with information obtained from the patients' clinical evaluation and other diagnostic procedures.
6. This is a screening test and needs to be confirmed with a confirmatory test if clinically indicated.

Limitation:
1.Calprotectin is not disease-specific and may be elevated in:Gastrointestinal infections,Colorectal cancer,Other inflammatory conditions and in NSAID usage.
2.Bloody stool may increase values due to neutrophil content.
3.Assay performance has not been evaluated in pediatric populations.
4.Strict specimen extraction and handling are critical for reliable results.

Please correlate with clinical conditions.
Method:- CHEMILUMINESCENT IMMUNOASSAY (CLIA)

CONDITIONS OF REPORTING

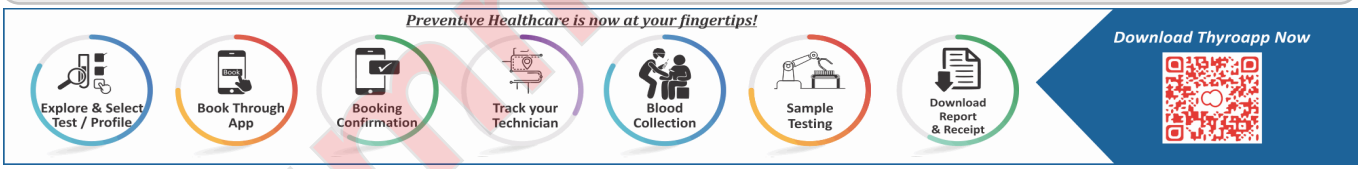

- The reported results are for information and interpretation of the referring doctor only.
- It is presumed that the tests performed on the specimen belong to the patient; named or identified.
- Results of tests may vary from laboratory to laboratory and also in some parameters from time to time for the same patient.
- Should the results indicate an unexpected abnormality, the same should be reconfirmed.
- Only such medical professionals who understand reporting units, reference ranges and limitations of technologies should interpret results.
- This report is not valid for medico-legal purpose.
- Neither Thyrocare, nor its employees/representatives assume: (a) any liability, responsibility for any loss or damage that may be incurred by any person as a result of presuming the meaning or contents of the report, (b) any claims of any nature whatsoever arising from or relating to the performance of the requested tests as well as any claim for indirect, incidental or consequential damages. The total liability, in any case, of Thyrocare shall not exceed the total amount of invoice for the services provided and paid for.

EXPLANATIONS

- Majority of the specimen processed in the laboratory are collected by Pathologists and Hospitals we call them as "Clients".
- **Name** - The name is as declared by the client and recored by the personnel who collected the specimen.
- **Ref.Dr** - The name of the doctor who has recommended testing as declared by the client.
- **Labcode** - This is the accession number in our laboratory and it helps us in archiving and retrieving the data.
- **Barcode** - This is the specimen identity number and it states that the results are for the specimen bearing the barcode (irrespective of the name).
- **SCP** - Specimen Collection Point - This is the location where the blood or specimen was collected as declared by the client.
- **SCT** - Specimen Collection Time - The time when specimen was collected as declared by the client.
- **SRT** - Specimen Receiving Time - This time when the specimen reached our laboratory.
- **RRT** - Report Releasing Time - The time when our pathologist has released the values for Reporting.
- **Reference Range** - Means the range of values in which 95% of the normal population would fall.

SUGGESTIONS

- Values out of reference range requires reconfirmation before starting any medical treatment.
- Retesting is needed if you suspect any quality shortcomings.
- Testing or retesting should be done in accredited laboratories.
- For suggestions, complaints, clinical support or feedback, write to us at **customersupport@thyrocare.com** or call us on **022-3090 0000**

+ *T&C Apply, #As on 5th December 2024 (Applicable for all company owned labs except Bhagalpur & Vijayawada),*

⋆ *As per survey on doctors' perception of laboratory diagnostics (IJARIIT, 2023), -Mumbai Reference Lab is CAP Accredited*
